

# Give Illinois Teachers the Support They Deserve

Teachers are the backbone of a successful education for our kids and they deserve our support. Every day, teachers across Illinois go above and beyond to help students, making personal investments to enhance their classrooms. That is why the Illinois Kids Campaign is advocating for policies that will support our public and private school teachers.

## Teacher reimbursements

- Reimburses teachers who spend their own hard-earned money buying supplies for their classrooms
- Up to \$250 credit for out-of-pocket expenses for teachers statewide

## Classroom technology and digital resources

- With today's students surrounded by technology in nearly all aspects of their life, funding would provide for computers and mobile classroom technology
- Allows teachers to create engaging learning opportunities and innovative instructional tools

## Funding to save arts, music and sports programs

- Tough budgets are placing arts, music, and sports as first to be cut in districts
- Keep these valuable programs alive by funding existing school-run programs, and partner non-profit organizations

## Facility and Infrastructure Investments

- Keeping the places where our children learn safe and supportive of high-quality education
